### Product Description

## Ironcraft: Manual Rotating Tree Saw

The X-treme Tree Saws are useful attachment when it comes to land management. From clearing undergrowth, to cutting out small trees, these attachment will leave your land looking like it should. We have two versions of our tree saw: Fixed and Manual Rotating. The Manual Rotating is new for 2019, and provides a 90-degree rotation in either direction. Hydraulics on both models are routed through the boom for protection. Both models have a ½" AR400 blade holder, and 15x high strength, four sided cutting teeth.

Notes: Includes 15 high strength, four sided cutting teeth, 90 degree manual rotation.
